Development Phases

To keep development manageable, I recommend splitting work into phases:

- **Phase 1 (MVP):** Modules 1–10 (Authentication through Admin Dashboard) plus basic Payments and Booking Engine.
- **Phase 2:** Modules 11–20 (Investor features, AI Trip Planner, Experiences, Local Services, SOS).
- **Phase 3:** Modules 21–34 (CRM, Analytics, Finance, Membership, Mobile Apps, AI, Franchise, SaaS, and advanced integrations).

This modular structure will let multiple developers work in parallel with minimal overlap while keeping the platform extensible for your long-term goal of **300+ curated stays and 30 investor-managed properties**.
